<b>Other Skills</b>	Bootstrap, Responsive Design, Ag-grid, Postman, Debugging skills, Accessibility issues
<b>Tools</b>	Bitbucket, Jira, Jenkins, Confluence, GIT
<b>Soft Skills</b>	Communicator, Problem Solver

## EXPERIENCE

**Systems Engineer** Oct 2023 - Present  
Tata Consultancy Services(TCS) *Bangalore, India*

- Achieved success as a Front end developer by delivering impact solutions for prominent client such as Morgan Stanley.
- Demonstrated proficiency and flexibility in technology stack such as Angular, Javascript, Typescript, HTML/CSS, RESTful API, Atlassian tools(Bitbucket, Jira, Confluence)
- Worked on developing an internal web application using Angular and also made use of libraries such as Ag-grid and highcharts.

**Senior Systems Engineer** July 2022 - Oct 2023  
Infosys Limited *Bangalore, India*

- Demonstrated consistent professional growth through progressively responsible roles, enhancing expertise in Angular and contributing to organizational success.
- Developed user friendly interface for client like Vanguard using Angular by collaborating with design and development teams to create high-quality, responsive interfaces that achieves cross browser compatibility.
- Maintained clean, efficient and well documented code and also debugging applications to ensure optimal performance.
- Wrote code to implement business and application logic on client-side, took part in developing services, directives and filters to create seamless user experience.

**Systems Engineer** Jan 2021 - July 2022  
Infosys Limited *Bangalore, India*

- Worked on transforming design mock ups into fully functional and interactive user interfaces by creating reusable components and optimizing performance
- Collaborated with backend developers which involved understanding and working with API's and data retrieval to ensure smooth functioning of the application.
- Active participation in code review and contribute to improve overall code quality. Identify and address performance bottlenecks within application, making optimizations to improve overall user experience.

## PROJECTS

---

**Hygiene Tooling Application.** Developed features for Morgan Stanley Application for higher management who can acquire information related to a project, such as project status, members working in the projects, expertise of the members, status of tickets opened or closed, number of bugs remaining in project and when the bugs are expected to be closed. Gives you details on how many projects are outdated and also which technology is being used for that particular project.

**Vanguard Banking Application** Developed features which helps in selection of investments, advice, retirement services and also gives insights to individual investors, institutions and financial professionals. Developed adobe tagging functionality which would help to monitor user activity from back end including click of a button and also scrolling it the page.

**Retirement Readiness Calculator** Developed features which helps with planning the financial aspects of an individual's retirement such as providing an idea where does that individual stand in terms of retirement savings, and how much to save to reach the necessary target and what would the retrievals will look like in retirement.

## CERTIFICATIONS AND TRAINING

---

1. Infosys Certified Angular developer
2. Infosys Certified JavaScript developer
3. Infosys Certified Agile developer
4. CSS Essentials (LinkedIn Learning)
5. RxJs Essentials (LinkedIn Learning)
